100% RICYCL ABLE

HB FLAMMABILITY RATING ACCORDING TO UL 94

SUITABLE FOR FOOD CONTACT

HIGH VISIBILITY AND NO PAINTING REQUIRED

RESISTANT TO CHEMICALS, OILS AND FUELS

ROT-PROOF AND NORMALLY MILDEW-PROOF MATERIAL

NO TOXIC

RESISTANT TO HUMIDITY AND SALINITY

FIRE CERTIFICATION FOR MPM Barriers

OUR POLYMER CONFIRMS THE V0 SELF-EXTINGUISHING CLASS

MPM Barriers are classified V0, according to international UL94 standard. The protections in Reflex technopolymer:

- Are low risk;
- Are self-extinguishing;
- Don’t spread the flame and stop burning within a few seconds. The installation of our barriers lowers fire risk, in order to measure the size of the fire exinguishing system, compared to other barriers made of alternative polymers - not classified as V0.

REFLEX
RESISTANT AND FLEXIBLE

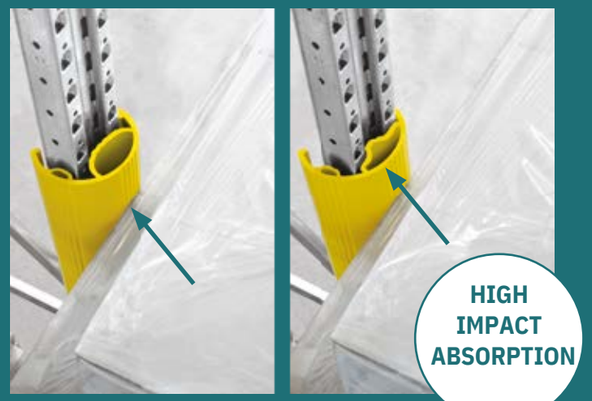
01 RACK PROTECTION

OUR PROFILES FIT ALL RACKS

Full range of techno polymer profiles for protection of warehouse racks.



HIGH IMPACT ABSORPTION

- One big central shock absorber in soft material to absorb front impacts.
- Two side shock absorbers in soft material to absorb impact during pallet placement on the rack.
- Tested and certified to EN 15512
- Reduced dimensions to keep manoeuvring spaces clear.
- Interlocking system with practical Click-fit tools
- Rigid outer cladding, scratch-resistant and easy to clean.

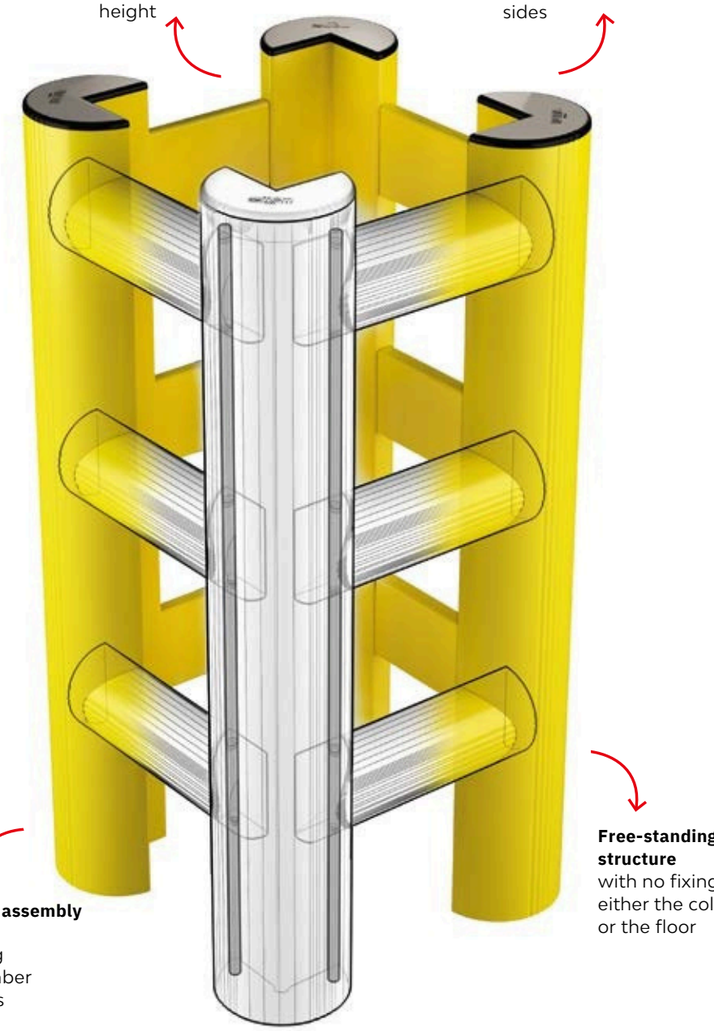
SOLUTIONS FOR
COLUMNS AND PILLARS

COLUMN PROTECTIONS

APPLICATION
On columns and pillars, also on just two or three sides

SAFETY
- Safeguard load-bearing columns and pillars to avoid structural damage to buildings
- Prevent physical trauma of vehicle operators due to shock loads resulting from impact against a column
- Provide a visual guide for forklift operators

SAVING
- Zero maintenance and damage to corners, projecting parts, and columns
- Prevent damage to vehicles



11

DOOR FRAME PROTECTION

Protection system designed to prevent forklifts collisions with overhead infrastructure and gates and doors jambs. It is created to keep under control the passage of forklifts that exceed height limits, attracting the attention of drivers and inviting them to a more careful guide. Useful to protect gates, loading docks or overhead assets. Available in different lengths.

12 LOADING BAY PROTECTION

Loading bays protections are shock-proof solutions which are set up near loading doors. They avoid possible slipping, falling and flipping of moving vehicles near open and unmanned loading bays.

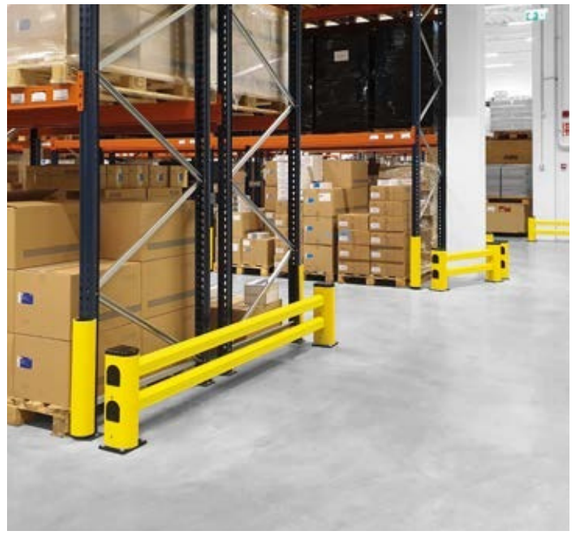
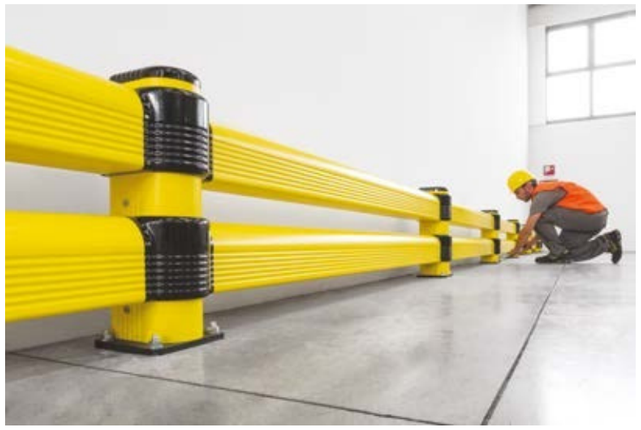
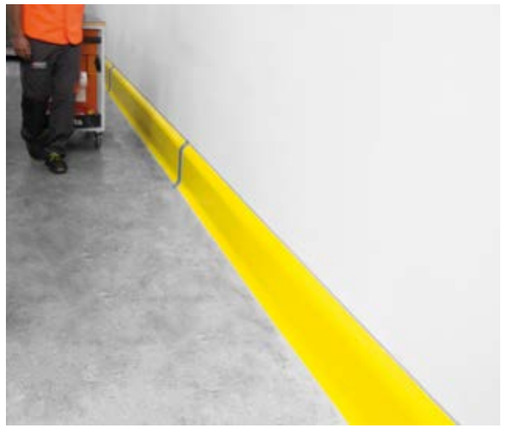
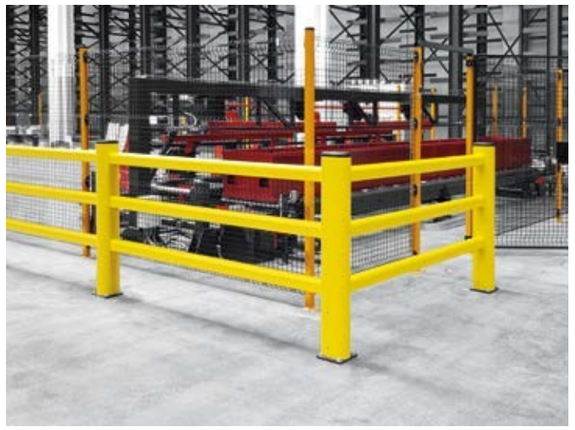
OUR INSTALLATIONS



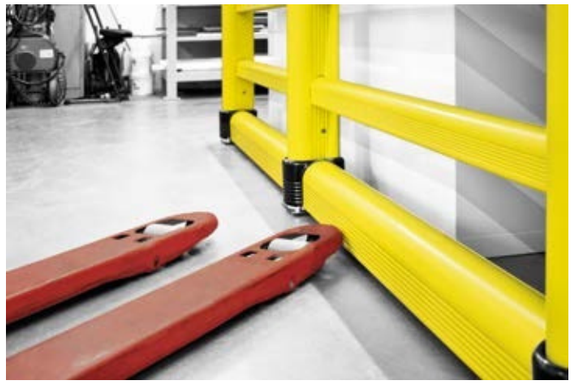
OUR INSTALLATIONS

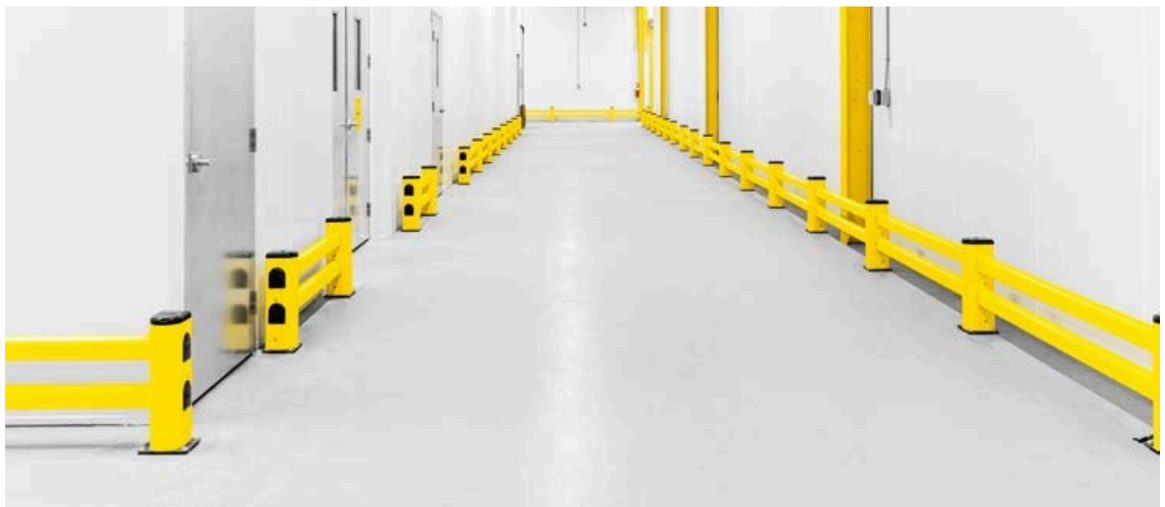






OUR INSTALLATIONS





MPM states that:

The safety coefficient and consequent use of the products requires the compliance with the appropriate assembling and installation instructions as defined in the technical catalogue on the corporate website www.mpmprotections.com. Therefore, before buying and installing MPM solutions please consult the technical data sheet of each product in the technical catalogue available on www.mpmprotections.com

Impact resistances indicated in the brochure, or in other documents, refer to laboratory tests and cannot take into account consequences determined by installation methods or peculiarities of the place where the products are installed (in an operational environment vehicle type, speed and mass, routes, angles of impact, ground and anchorage are variable and uncontrolled conditions that no test can replicate); the data refers to an intact product which length is indicated on the test report and it can be affected by alterations from incorrect maintenance, wear and tear, as well as the methods and characteristics of installation (with specific reference to floor-mounted products); the weight, dimensions, colours and characteristics of the material refer to the sample and the conformity with the latter of the product supplied will be subject to normal production tolerance. The product may be affected by environmental installation conditions.

The standard operating temperature of MPM flexible protections is generally from +5 °C to +60 °C. For installations in low temperature environments up to -30 °C an alternative material should be required. The fastness of the colour and its brightness depend on wear and tear and weather conditions that can affect its intensity over time. For outdoor applications exposed to direct sunlight it is possible to choose the grey colour.

Images in the brochure are for advertising purposes only and do not in any way represent how the products should be used.

Full version of MPM products warranty available on corporate website
www.mpmprotections.com
