Our fit out services  
have transformed  
warehouses  
around the UK

## Service Overview

Our workshop process begins with a thorough understanding of your needs and challenges, followed by a detailed site visit to assess your space and requirements. Our team then designs and plans custom solutions tailored to your specifications.

Once the design is finalised and you are happy to place the order, we proceed to manufacture the bespoke components using high-quality materials and craftsmanship. Finally, we will arrange for one of our install partners to install the customized workshop elements in your facility, ensuring a seamless integration into your workflow.

The values that dictate the approach in everything we do are...

- People-Centred
- Pragmatic
- Communication
- Behaviours

## CASE STUDY: Owen Mumford

“ Owen Mumford is a leading manufacturer of self-administered drug delivery systems with two manufacturing sites in the UK and third in Malasia. Clarity was initially involved in coaching the senior leadership team in an Introduction to Lean and Visual Management course. Due to the success of this, they then decided to enrol all production personnel into our 5S workplace organisation workshops as well as facilitating numerous VSM workshops too. The implementation of these workshops has resulted in substantial cost savings across all their main product platforms. For example, in one product family alone, transport savings of £700,000 were eliminated after a successful Clarity project.”

### Why choose us for a bespoke workshop fit out, when you can coordinate it yourself for a cheaper price tag?

We fully admit that there will be cheaper ways of fitting out your workspace. There's no denying it. However, whilst it may seem more cost-effective to coordinate it yourself, it may not work out cheaper once you have considered how much time and effort you have to put into the project. Where we are different to other suppliers, is that we offer the whole project in one, so you don't have to worry about the time and hassle of sorting it yourself. All you will need is a vision of what you want to achieve and the answers to any questions we may throw at you. Scratch that, you don't even need a vision. We can start off a project like this with a Lean Layout workshop to ensure your process is as efficient as possible and provide 3D visuals to base the workshop fit out quote on.
