## Our Anti-Fatigue Matting

Our anti-fatigue floor matting is an indispensable addition to any workplace where prolonged standing is required. Crafted with ergonomic design and high-quality materials, it offers unparalleled comfort, reducing strain and fatigue on workers' feet and legs. By promoting better posture and circulation, it contributes to a healthier and more productive work environment.

## Fatigue Issues in the workplace

Prolonged standing in the workplace can lead to various health issues, ranging from discomfort to serious conditions. Fatigue from extended standing can result in sore feet, swollen legs, and lower back pain. Over time, it may contribute to musculoskeletal disorders such as tendonitis and plantar fasciitis.

Additionally, decreased circulation and increased pressure on the veins can lead to varicose veins and even deep vein thrombosis. Beyond physical discomfort, fatigue can impair concentration, reduce productivity, and increase the risk of accidents due to decreased alertness. Addressing these issues is crucial for maintaining employee well-being and ensuring optimal workplace performance.

To alleviate the adverse effects of prolonged standing, workplaces can implement ergonomic solutions such as anti-fatigue floor mats, height-adjustable workstations, and regular breaks. Providing supportive footwear, encouraging proper posture, and promoting stretching exercises can also help mitigate discomfort and reduce the risk of musculoskeletal problems associated with extended standing.

## CASE STUDY: Owen Mumford

“ Owen Mumford is a leading manufacturer of self-administered drug delivery systems with two manufacturing sites in the UK and third in Malaysia. Clarity was initially involved in coaching the senior leadership team in an Introduction to Lean and Visual Management course. Due to the success of this, they then decided to enrol all production personnel into our 5S workplace organisation workshops as well as facilitating numerous VSM workshops too. The implementation of these workshops has resulted in substantial cost savings across all their main product platforms. For example, in one product family alone, transport savings of £700,000 were eliminated after a successful Clarity project.”

## Why choose us to solve your employee fatigue issues?

At Clarity, we believe in putting your needs first. That's why we offer a comprehensive range of anti-fatigue floor matting solutions designed to address the specific challenges you face in your work environment. Our mats provide ergonomic support, reducing discomfort and fatigue for workers who spend long hours on their feet. We prioritize durability and quality, ensuring our products withstand the rigors of industrial settings while maintaining their effectiveness over time. With a commitment to excellence and customer satisfaction, we strive to deliver reliable solutions that improve workplace safety and productivity. Whether you're in manufacturing, hospitality, or healthcare, choosing Clarity means investing in proven solutions that prioritize your well-being and comfort. Let us partner with you to create a safer, more comfortable working environment for you and your team.
