

Case Study: Huntsman IFS Chemicals

A little about Huntsman IFS.....

Huntsman IFS are a UK manufacturer of polyurethane products. Having been founded in 1982 the company has grown in size as well as increasing its range of products. Today Huntsman IFS can offer a broad spectrum of manufacturing and technical services such as flexible foams to rigid foams, coatings, and elastomers.

Having a passion for HSE and their moto: Walk the Talk – Safety in Action, they are continuously improving their facility.

Huntsman IFS's Challenges

The Challenge

As a company Huntsman IFS are committed to continuous improvement. Due to this they recognised the need to implement Visual Standards throughout their factory, specifically with Cleaning Stations for each Zone.

Once Huntsman IFS had reached out to us we were able to coordinate a call where we discussed their 6S journey and the need for the Cleaning Stations to ensure their 6S programme was supported and increase the amount of employee engagement.

Our Plan

When Huntsman IFS approached us they were very clear in what they wanted and had already created the layout of the stations they required through our Clarity creator tools.

We discussed the different options for fixing and decided the best fit for them as a company would be wall mounted boards manufactured out of Di-Bond, as this would provide a much more durable and resilient solution.

Due to clear communication and our creator tools we were able to move swiftly and from the original enquiry through to delivery it only took a matter of days.

The Results

“

“Clarity’s website was easy to use and their Visual management design Creator tool that I downloaded offered everything. This enabled me to design my very own layout, giving me the peace of mind the correct tools could be included on each cleaning station.

I would recommend Clarity every time. The process was fast and friendly from enquiry to delivery. Having received the products I can confirm they are of top quality and look very professional. As a company we cannot wait to start using them.”

Richard Foreman, Huntsman IFS
